PROFILE SUMMARY

Web development student with proficiency in HTML, CSS and JavaScript. I come from a non-IT background but have developed a strong understanding of front-end web technologies and responsive design. Focused on applying my knowledge to practical projects and furthering my expertise in web development.

WORK EXPERIENCE

MERN Stack Developer Intern   2024 - PRESENT
Techolas Technologies

- Developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Learning and applying best practices in web development.
- Collaborating with the development team to build and maintain scalable front-end and back-end systems.
- Gaining practical experience in building responsive web designs and working with APIs.

PROJECTS

- PC and Console Games Website

Built a multipage website with subscription plans, responsive design, and interactive elements.

- Responsive Movie Website:

Designed a dynamic website with an image slider, trailer integration, and category filtering.

- Milk Products Website

Developed an e-commerce site for milk products, featuring image sliders, product cards, and engaging content.
